

Academic Talk Summarizer: Audience Guide

Quick Start

This platform evaluates how well different AI models understand academic talks. You'll ask questions about talks and rate the AI responses.

Step 0: Log in the platform

Use username: audience Use password: audiencepass

Step 1: Ask Questions (Even while the talk is ongoing!) in the Audience Questions Tab

1. **Select a talk** from the dropdown
2. **Enter your question** (Default Example: "Summarize the following talks key findings within 5 lines")
3. **Select difficulty of your question:** Easy (basic) or Hard (complex analysis)
4. **Enter your nickname** (use consistently - you'll need it later)
5. **Submit** - AI answers generate in 30-60 seconds after talk is uploaded from OpenAI and Perplexity

Step 2: Rate AI Answers (LLM Answers Tab)

1. **Enter nickname**
2. **Choose questions:** Enter 0 in the Extra Questions field to retrieve only your questions, or a number (k) to retrieve k questions from other users in addition to yours.
3. **Load Answers** and rate each question:
 - **Preferred Answer:** Choose Model 1 or Model 2 (optional)
 - **Quality Scores:** Rate each model 1-10 (optional)
 - **NOTE** Rate both model preference and quality score, or your ratings' will not be considered for the leaderboard.
4. **Press Submit All Ratings**

Step 3: View Results (Leaderboard Tab)

- **Audience Leaderboard:** Shows ratings from all audience members in real time, as questions come in.
- **Speaker Leaderboard:** Shows ratings from the speaker only (ground truth)
